Being early access, the game runs fairly well and plays well. It has alot of similarities to one of my favorite zombie survival games, 7 days to die. I can definitely say the 15 dollar price is worth it. This has potential to be one of the better zombie survival games out there.. A short, somber third-person walking simulator with themes of childhood trauma. You already know if you're the kind of person this will appeal to.... Porno Studio Tycoon is an economic simulator about creative people who made our life happy)

Ready? You are the producer and you need to create good porno movie. To reach the goal you should improve your skills, hire actors with certain abilitys, choose a genre of the new movie etc.

You should know this game not about porno but tycoon one. First of all you need to analyse, think and be ready to defeat your competitors. If you like economic simulators then just buy this game.. Have fun running around. It's 90% of this game. Battle system gets boring quickly and lacks depth imo. Also as far as I know you can't escape once you trigger an encounter. Game is tiny - handful of dungeons and one city.

It's bad. There are better JRPG's out ther for similar price.. Some youtubers are saying this isn't any good but I thought it was pretty good. The graphics in some areas in the game are great and the use of sound is brilliant. It can be a bit frustrating in areas when you die and have to start over and over and the numerical code is a tricky one. overall a good game. took abot 1.5 hours to complete. Check out the vid and take a look for yourself.

Fun game, but definitely not for the faint of heart. The game doesn't hold your hand and it takes a little experimentation to understand how everything works.

Nothing quite like your environmental controls going offline and on your way to fix them remember that you abandoned that deck of the ship to an out of control fire. Freeze to death or burn to death, ah choices.. I usually prefer to cover horror games, but seeing how I also have a love for multiplayer games and the team who made horror games like Stifled and Lurking, I wanted to give their newest sound-based game a shot. Here's the usual gameplay insert, all that good♥♥♥♥♥♥♥♥

Enough blatherin', let's get to why I genuinely believe this game has such a high appeal to me and many others.

This FPS requires your hearing as much as your visuals. You're practically blind, stumbling about in a dark, monotone environment. The only guide lines you'll receive are... well, literal guide lines represented as white sound waves. Every single action has a reaction, each scaling in magnitude depending on the loudness of said action. Players must keep this in mind as they hunt each other down to kill them in a classic deathmatch fashion. Currently, deathmatch is the only available mode with three maps to choose from, but at least there are bots so you never feel alone, and you can host a server to play with your chums. There's even a quick play feature to hop right into a match almost flawlessly, as well as a rewarding level-up system where you don't rely on paying for a boost; you get what you get by actively playing and getting good. That's how a shooter should be nowadays, nothin' but using skill in order to reap in the rewards with no ♥♥♥♥♥♥♥♥t buyable pass.

With this said, people have claimed the game to become too stale and chose to refund it until it has more to it. From speaking with the developers within a stream, I get the feeling they want to add more, and mind you, I'm typing this as it's still in early access, so... chill people, lol. They still have a while yet before the full product is 100% done.

This game has so much potential to be a great multiplayer game, but the dev team should make sure to take the right steps in order to do so. Between the unique sound-based combat and seamless connection, you're guaranteed a blast that'll last for a long while. Additionally, you can visit their Discord channel and stay up-to-date with news, as well as visit their Twitch to view the developers play with their followers! An active team talkin' to an active community? Now that sounds like a nice gig for me. Thanks for readin', and I hope this review was helpful enough for ya. Have a great day, folks.. The game is safe from anything edgy or grandiose to be an outstanding title, and that's probably why I have completely missed it when it came out. But with its beautiful art, solid feel, enjoyable puzzles and super easy mechanics, it's far from being a waste of time. I'm sad it's over not because I'm disappointed, but because I enjoyed the process of playing it. It was not an epic rollercoaster ride, but a journey equally pleasant all way through. With this game you get the kick in playing it, not in getting it finished.

Influenced heavily by adventure films and games of the past. Devil in the Capital will not shock you, will not turn your world upside down, will not break the grounds, but if you like the classic feel of adventure titles, you will enjoy it. The only thing that stops this game from being great is that developers did not have a megalomaniac urge to make the best game in the world. They just did a good game, and that's what it is. And I think, it is better to make a good game and succeed at that, than try making a great game and fail to deliver.

So, if you like the Black mirror and syberia series, you will most likely enjoy this one. Just don't expect much - and you'll be pleasantly surprised on every corner. I was!. It's a mediocre sports game that only plays online... and there's nobody online to play it with.

Hang around all day and you won't find a full server. Thanks to its unlock system, when you do find an opponent you'll be playing at a horrible disadvantage until you also get all the unlocks - but there's pretty much no incentive to take the punishment until then.

A complete waste of money.. Love this game ! Graphics are very tidy and I think this style of graphics always works well with VR. Plays smooth and the guns have a nice feel to them - accurate and the reloading mechanism works very well. I also love the look of the zombies, some really nice details on them.

---

If you like Unturned and like playing VR this is the closest you'll get to merging the two. It does need a lot more work and I do hope more people will buy this and support the developers so this can be made into something great.

Lets see so more good solid update please ! Some multiplayer, some building, maybe vehicles ? keep it up !. Very atmospheric horror. Reminds of the film with the same name. Sounds and tension were pleasant. If there were no bugs then it would pass in one breath.
